

METHOD, SYSTEM, AND STORAGE MEDIUM FOR PROVIDING WEB-BASED SUPPLIER PERFORMANCE DATA ACROSS A SUPPLY CHAIN

Abstract

A method, system, and storage medium for providing web-based supplier performance data across a supply chain is disclosed. The method includes gathering customer data and supplier data and storing it in a data repository, parsing purchase order data from a plurality of purchase orders and storing parsed purchase order data in the data repository, and parsing shipping receipt data from a plurality of shipping receipts and storing parsed shipping receipt data in the data repository. The method also includes receiving a request for supplier performance metrics from a requester. The request includes at least one supplier selection, at least one customer selection, and a report type selection. The method further includes retrieving data corresponding to the request from the data repository, processing the data in accordance with the report type selection resulting in a supplier performance

report, and presenting the supplier performance report to the requester over a network.
